CARD GAME

GAME PLAY

In Monstrous Moon you use your hand of monsters to catch humans by winning tricks. You want to win certain humans and maybe avoid others based on previous tricks, and to make the most of your hand, you have to carefully manipulate the light of the moon (trump suit). Some monsters are stronger than others depending on the phase of the moon.

KEY FEATURES

Open information

The nine humans up for grab each round are placed on the table, so you know exactly what hands you want to win - and which ones to avoid.

The moon

By playing low cards, you can move the moon marker and change the trump. Hopefully you can play your hand stronger just in time.

No need to follow

You don't have to follow suit, which allows you to save your cards for when they become trump - or get rid of them, if that's what you need.

Shoot the moon

Jester cards earn you negative points, but if you can get them all, you win the game immediately.

COMPONENTS: **36** monster cards (standard size) · **27** human cards (small size) · **1** Moon board · **1** Moon marker (eg wooden cube) · **4** reference cards
